Company & Branch Management

Run several companies and any number of branches from one installation, each with its own stock, staff, pricing and books — while head office keeps a consolidated view.

- **Multi-company setup** with isolated data per company
- **Unlimited branches** under each company
- Branch creation, editing and deactivation
- Branch-wise opening and closing timings
- Per-branch email recipients for automated reports
- Head-office **admin panel** above all companies
- Company subscription **billing rates** and credit ledger
- Invoice setup and automated platform invoicing
- Billing summary and delivery history
- Branch switching without re-login
- **User impersonation** for support and troubleshooting
- Company-level business policies
- Branch performance comparison
- Consolidated head-office reporting

Users, Roles & Access Control

Decide exactly who sees what. Permissions are set per role, per screen and per branch, and every change is recorded.

- User accounts with profile and contact details
- **Role management** with unlimited custom roles
- **Screen-level permissions** — view, add, edit, delete
- Menu builder: add, rename, reorder or hide any page
- Branch-wise access restriction per user
- Separate HR permission set for payroll staff
- Module enable/disable per company
- **Activity log** of every record change with user and timestamp
- Login, logout and session management
- Forced logout notification to a signed-in user
- Password reset and email verification
- Terminal lock with supervisor password
- Separate super-admin login for the platform owner

Product Catalog & Inventory Master

One catalog serves the POS, the storefront, purchasing and production — with variants, bundles, recipes and add-ons all defined in the same place.

- Product master with codes, images and full descriptions
- **Departments, sub-departments** and sections
- Brands and free-form tags
- **Units of measure** with per-product conversion
- **Product variations** — size, colour, and custom attributes
- Variation products with priority ordering
- **Deals and bundles** made of multiple items
- Add-ons and add-on categories (toppings, extras)
- Dedicated POS product list, separate from full catalog
- **Recipes** mapping finished goods to raw materials
- Ideal usage standards for consumption control
- **Barcode and QR generation** with label printing
- Multiple images per product, plus a mobile-specific image
- Automatic image compression and CDN delivery
- **Bulk product upload** via Excel
- Downloadable sample import template
- Duplicate-product generator for fast catalog build-out
- Bulk update of department, tax and unit
- Retail price export to CSV
- Active / inactive product status
- Non-stock (service) item support
- Search by name, code or department

Stock Control & Transfers

Live quantities per branch, with a documented paper trail behind every movement — opening, adjustment, transfer and consumption.

- **Real-time stock levels** for every branch
- Opening stock upload from Excel
- **Stock adjustments** with reason and approval
- Printable stock adjustment voucher
- Daily stock snapshot for day-end reconciliation
- Physical inventory count sheet
- Terminal-wise stock allocation
- **Branch-to-branch stock transfer**
- Transfer orders with a raise, approve and receive workflow
- Transfer status tracking and item-level editing
- Direct transfer report
- Raw material usage tracking
- Automatic daily usage generation
- Stock reports in PDF and Excel
- Stock filtering by branch, department and item

Purchasing & Vendors

The full procure-to-pay cycle: raise the order, receive the goods, book the bill, and settle the vendor — with the ledger updating at every step.

- **Purchase orders** with draft and final submission
- PO approval and status workflow
- **Goods Received Notes (GRN)** against purchase orders
- GRN adjustments for short or excess delivery
- Automatic stock update on receipt
- **Vendor master** with contact and payment terms
- Vendor product catalog with agreed rates
- Assign products to multiple vendors for rate comparison
- Create vendor products directly from a purchase order
- **Vendor ledger** with running balance
- Vendor payments and advance payments
- Payment due-date tracking and payables ageing
- **Cheque management** with clearance tracking
- Payment vouchers and vendor receipts
- Purchase returns
- Vendor ledger export to PDF and Excel
- Purchase and vendor performance reports

Demand Planning & Distribution

Branches raise what they need, the central store fulfils it. Designed for commissary and hub-and-spoke operations.

- **Branch demand requests** raised against the central store
- Received-demands queue at head office
- Approve, part-fulfil or reject each line
- Convert approved demand into a purchase order
- Receive stock from master store
- Demand status tracking end to end
- Demand order report
- Workload report per production centre
- Bulk demand clean-up tools

Point of Sale & Terminals

Counter operations from open to close: ring the sale, take the payment, print the receipt, and declare the drawer at day-end.

- **Multiple POS terminals** per branch
- Terminal registration and device binding
- **Terminal lock / unlock** with supervisor override
- Day open and day close with cash declaration
- Sales invoice creation and reprinting
- **Thermal receipt printing**, including Sunmi cloud printers
- Per-terminal printer and print-format setup
- Kitchen and department printer routing
- Multiple payment methods per invoice
- Split and part payments
- **Sales returns** with stock restoration
- Line-level and invoice-level discounts
- Sales person assignment for commission tracking
- Order modes — dine-in, takeaway, delivery
- Cash in / cash out from the drawer
- **Sales declaration** with variance against system totals

Orders, Delivery & Fleet

Everything after the order is placed — who prepares it, who carries it, what it cost to deliver, and when it actually arrived.

- Central order panel across all channels
- **Order status workflow** with a full change log
- Move an order to a different branch
- Sub-orders and order line editing
- **Pre-order booking** for future dates
- Web order queue from the online store
- Delivery challan generation and updating
- Delivery charges and delivery notes
- **Rider / driver management**
- Vehicle register with brands and documents
- Vehicle manager dashboard
- **Third-party service providers** for outsourced delivery
- Assign orders to riders or service providers
- Service provider ledger and settlement
- Rider-wise assigned order sheets
- Booking delivery report
- Order timing summary — prep and delivery duration
- Amount receivable against delivered orders

Customers & Receivables

A single customer record carries addresses, credit limit, ledger and entitlements — used identically at the counter and online.

- Customer master with full contact history
- **Multiple delivery addresses** per customer
- Customer accounts and **running ledger**
- Credit limit control and credit approval
- Payment receipts against invoices
- **Customer ageing** by 30 / 60 / 90 days
- Due-date tracking and follow-up list
- Customer-specific discount schemes
- **Customer wallet** with top-up and spend
- Wallet-linked discounts
- Bank-card based discounts
- Customer balance and ledger export to Excel
- Merge duplicate customers by mobile number
- Customer sales and profitability reports

CRM & Lead Pipeline

A sales pipeline attached to the same customer base — a converted lead becomes a live customer without re-keying anything.

- **Lead capture** with source and value
- **Kanban lead board** with drag-and-drop stages
- Lead assignment to sales staff
- Bulk assignment across a team
- **Follow-up scheduling** with reminders
- Call and meeting logging
- **Quotation builder** against a lead
- Quotation PDF for the prospect
- File attachments with preview and download
- **Convert lead to customer** in one action
- CRM dashboard with pipeline value and win rate
- Lead export to Excel and PDF

Production & Job Orders

For businesses that make or process goods — kitchens, workshops, laundries and bottling. Consumption is booked against the recipe automatically.

- **Job orders** with items, quantities and target dates
- Repeat a previous job order in one click
- **Work orders** with costing detail
- Recipe-driven raw material consumption
- Recipe limits and yield control
- Send items to workshop and track return
- **Per-piece labour rates** by process type
- Production cost calculation, live and provisional
- Returnable container tracking — empty and damaged
- Job order detail sheets and PDF
- Factory operation report

Finance & Accounts

Books that close. Every sale, purchase, payment and expense posts to an account, and the statements are produced from that ledger.

- **Chart of accounts** with account groups
- Multiple bank accounts per branch
- **Cash and bank ledgers** with running balance
- Cash deposits and withdrawals
- Cash in / cash out register
- Bank ledger PDF and cash ledger PDF
- Editable narrations on ledger entries
- **Expense entry** with category and branch
- Expense categories and budgets
- Expense vouchers, cash vouchers and payment vouchers
- **Tax master** with per-product tax assignment
- **Profit & Loss** — standard and detailed
- Balances summary across accounts
- Payables and receivables position
- Cheque register with clearance status
- Debit and credit manual entries
- **QuickBooks synchronisation**

Human Resources & Payroll

A complete payroll department: hire to final settlement, with attendance, statutory deductions and payslips generated from one dataset.

- Employee master with documents and qualifications
- Hiring, transfer, resignation and termination
- Inactive and rehire employee records
- **Departments and designations**
- Shift definition with grace time
- **Attendance** — device upload or manual marking
- Daily attendance edit and approval
- Check-in / check-out notifications
- Absent marking and absentee reports
- Weekend and **public holiday** calendar
- Company events calendar
- **Leave management** with leave heads
- Leave balance tracking and approval
- **Loans** with instalment scheduling
- Loan deduction from salary and loan vouchers
- **Advance salary** requests and recovery
- Bonuses and annual increments
- Promotions with effective dating
- Allowances — standard and special
- **Overtime** by duration or fixed amount
- **Income tax slabs** with per-employee application
- **EOBI** registration and contributions
- **Provident fund** management
- Employee security deposits
- Employee ledger and final settlement
- **Salary sheet generation** and payslip PDF
- Attendance sheets and reports in PDF
- Branch-wise, department-wise and employee-wise views

Restaurant & Service Operations

Floor-based operations for restaurants, salons and clinics — tables, rooms, appointments and kitchen routing.

- **Floor plan** setup with multiple floors
- Rooms and tables with capacity
- **Kitchen departments** for order routing
- Kitchen printer assignment per department
- Kitchen order tickets printed by station
- **Service booking calendar** with staff view
- Bookable time slots with capacity limits
- Dine-in, takeaway and delivery order modes

Promotions & Discounts

Campaign tools that apply automatically at the counter and online, with every discount recorded against the user who gave it.

- **Discount schemes** by percentage or fixed amount
- Discounts scoped to product, category or customer
- Time-bound promotional campaigns
- Promo codes
- **Bank / card partner discounts**
- Wallet-linked discount offers
- Discount approval panel
- **Discount audit log** — who approved what, and when
- Business policy rules governing discount limits

Online Store & Website

A customer-facing storefront driven by the same catalog and stock, managed entirely from inside the ERP — no separate admin.

- **Theme settings** — colours, logo and branding
- Homepage sliders and banners
- Advertisement blocks
- Customer testimonials
- Social media links
- **Publish or unpublish products** to the storefront
- Connect departments to online categories
- SEO-friendly product URLs
- **Delivery areas by city** with per-area charges
- Branch trading hours shown to customers
- Automatic open / closed status per branch
- Online booking slots
- Assign a POS terminal to receive web orders
- Website order queue feeding the ERP
- Website items summary report
- One-click site rebuild after changes

MODULE 17

40+ REPORTS

Reporting & Business Intelligence

Over forty built-in reports plus a self-service builder. Every report filters by date, branch, department and terminal, and exports to PDF or Excel.

- **ERP report dashboard** — single entry point
- Premium sales dashboard with live KPIs
- **Custom report builder** with saved filters
- Item sale report
- Consolidated item sale report
- Item sale database extract
- Sales invoices report
- Customer sales report
- Sales person report
- Sales return report
- Sales declaration report
- Invoice details report
- Stock report and stock adjustment report
- Inventory details and general details
- Physical inventory sheet
- Raw material usage report
- Transfer and direct transfer reports
- Purchase report and vendor report
- Vendor ledger report
- Demand order report
- Customer ledger and **customer ageing**
- Orders amount receivable
- Orders timing summary
- Booking order and booking delivery reports
- Expense sheet and expense by category
- Cash in / out report and balances
- **Profit & Loss** — standard and detailed
- **FBR tax report** and export
- Website items summary
- Attendance, salary and loan reports
- Factory operation and workload reports
- Terminal-wise and branch-wise breakdowns

DELIVERY OPTIONS

Every report exports to PDF and Excel, prints on A4 or thermal stock, and can be emailed automatically to branch or head-office recipients on a schedule.

AI Assistance & Forecasting

Ask the system questions in plain language and get answers from your own live data — with a query guard that keeps access read-only and permission-aware.

- **Sales forecasting** from historical trends
- Forecast chat — ask about future demand conversationally
- **Plain-language querying** of your live business data
- Query guard restricting AI access to safe, read-only reads
- In-app AI support assistant
- AI-generated product imagery and descriptions
- Demand suggestions to guide purchasing

Integrations & Communications

The ERP is the hub. Sales channels, accounting, tax authority, payments and messaging all connect to the same records.

- **Shopify** two-way product and order sync
- Live order webhooks from Shopify
- **QuickBooks** accounting synchronisation
- **FBR digital invoicing** and tax reporting
- **Easypaisa** payment collection
- bSecure checkout integration
- **WhatsApp** messaging with per-user access control
- **SMS gateway** for order and payment alerts
- Automated email — declarations, reports and alerts
- In-app team chat
- Browser and push notifications
- **REST API** for mobile and third-party apps
- SOAP web service endpoint for legacy systems
- Sunmi cloud printing for remote receipts

Platform & Technology

Built on a current, long-supported stack that runs on standard hosting and

scales from a single shop to a multi-company group.

LAYER	TECHNOLOGY
Framework	Laravel 11 on PHP 8
Database	MySQL, single shared schema with company and branch scoping
Interface	Livewire 3 with live-updating panels, Bootstrap responsive layout
Documents	mPDF, DomPDF, FPDF and TCPDF for invoices, vouchers and reports
Spreadsheets	Maatwebsite Excel for every import and export
Printing	Thermal receipt printers, kitchen stations and Sunmi cloud devices
Codes	Barcode and QR generation with label layouts
Images	Automatic optimisation with Cloudinary delivery
Audit	Activity log across all business records
AI	OpenAI for forecasting, querying and content
Access	Role-based permissions, branch scoping, secure impersonation
Background	Queued jobs for sync, email and report generation
